Subject: Utility Aid - A Short video all about their National Charity Tender

It's that time of year again when utility bills start to increase and if your organisation is looking to get a better deal on gas and/or electricity then please see below.

Utility Aid has launched their National Charity Tender!

Utility Aid manages energy 'baskets' containing thousands of properties across the UK. By grouping the energy consumption, the basket participants benefit from considerable purchasing power and award-winning aftercare services!

To learn more about The National Charity Tender and how it can help your organisation please watch the following video

<https://www.youtube.com/watch?v=4gZXWllboxE>

If you'd like to speak to Utility Aid about this opportunity, please contact customercare@utility-aid.co.uk

Further information about Utility Aid can also be found on the CRT website at <https://www.coalfields-regen.org.uk/england/save-money-on-your-organisations-energy-bills/>

[Attached](#) is a guide to explain how the process works with Utility Aid and I have already received positive feedback from members that have used Utility Aid and are starting to save money.

If you have any questions please contact me.

Kind regards

Steve
