## AI (Artificial Intelligence), Cyber Security & Digital Green

### Artificial Intelligence

This AI programme is aimed at those seeking to grow their business reach, engagement and ROI via the use of AI. The pitfalls and pros of AI are examined, with strategies for streamlining work streams in a sustainable and ethical manner.

### Cyber Security

This programme is suitable for company wide delivery, providing an opportunity to cascade essential Cyber knowledge through an organisation, raising awareness and safeguarding business operations, and for those working in a generalised IT/front line/help desk capacity keen to develop into a more specialised Cyber role.

### Digital Green

This programme enables organisations to develop internal capacity and expertise, and to demonstrate their commitment to sustainable practices. It is suitable for any

member of staff and enables participants to audit their organisations current position, and to make recommendations for change. The programme covers:

- Introduction to Sustainability and its Global Importance
- The Role of Technology in Sustainability
- Environmental Impact of Technology and Mitigating Negative Impact
- Technology for Sustainable Industries
- Green Product Design
- Ethics in Business, Technology, and Sustainability
- Sustainability Reporting

Training is fully funded for businesses in North East Derbyshire and Chesterfield and is being delivered by althaus digital.

Dates and delivery methods are flexible. To find out more or book your place, please contact Am Seabright, [am@althausdigital.co.uk](mailto:am@althausdigital.co.uk), 07913424467.
